2018 – 2020
Hyderabad, India

Intermediate

Delta Junior College

95 percent

Projects

Personal Portfolio

The personal portfolio is my personal website. It contains my personal details including my educational details, skills, experience and projects. This project is done using HTML, CSS and JavaScript

Console Application

The console application is a python project which uses a sqlite database. The application is similar to dream-11 game which is a fantasy game where a user can select a group of 7 players from a group of 14 players based on their performance, and the total score of the team is calculated. The admin function has also been added.

Certificates
